

ONYX Engineering Roadmap & Architecture 2026

Project Titan is our next-generation local encryption engine scheduled for release on 15 November 2026. The primary encryption cipher used by Project Titan is AES-256-GCM with Argon2id key derivation. All production servers are hosted in the Mumbai Tier-4 Data Center (Facility Code: BOM-DC04). Refund Policy: Enterprise licenses include a 30-day unconditional money-back guarantee.
